content available in 8 colors according to the RAL chart.*

A close-up photograph of the interlocking gym floor tiles. The tiles are dark grey with a fine, pebbled texture. Four numbered callouts are placed on the image: '01' in the top left, '02' in the top right, '03' in the bottom left, and '04' in the bottom right. The callouts are enclosed in thin, light-colored rectangular boxes.

What makes us stand out.

We have earned the reputation for manufacturing high quality rubber products. Our attention to detail and commitment to excellence for every project, coupled with our experience and knowledge of the industries we serve, ensure that your rubber products will meet or exceed your expectations.

Products coming from recycling and the primary production Virgin.

We use SBR and EPDM granules for
manufacturing of our molded products.

Cutting-edge machine park

Thanks to modern machines produced by renowned European companies, we are able to provide better quality of our materials and precise cutting.

High -quality products

Our production is based only on high quality components coming from European countries for which we provide quality certificates.

Our sports floors are produced from SBR and EPDM rubber granules in combination with a high-quality polyurethane binder. In connection with high production requirements they meet extremely high technical parameters.

Thanks to innovative production technology we achieve 100% repeatability of shape and thickness with very high efficiency of produced floors.
