THE COMPANY

Our company has been dedicated to manufacturing Pilates equipment for over 15 years, giving us extensive knowledge and experience in the Pilates industry. We are committed to quality and innovation, which has led us to develop some of the most advanced and recognized Pilates equipment on the market.

Our products are designed to provide a superior Pilates experience for both, beginners and advanced users. We offer a wide range of products, from classic Pilates machines to more innovative machines that incorporate advanced technologies. All of our products are designed in collaboration with international Pilates experts, ensuring their quality and effectiveness.

In our production processes, we ensure that only the highest quality materials are used and that the highest standards of quality are applied at every stage of production. Additionally, we are constantly evolving and developing new products, which allows us to stay at the forefront of the Pilates industry and continue to improve the user experience.

Our company also provides high-quality customer service, with a highly trained and committed team dedicated to providing the best possible support to our customers. We prioritize meeting their needs and are always willing to help.

Finally, our products have received numerous accolades and industry recognition and are used and recommended by some of the world's most renowned Pilates professionals. Additionally, our company participates in important industry events.

Thanks to our commitment to innovation and quality, we have over 20 patents and industrial designs of our own that make our products truly unique.

MASTER INSTRUCTOR REFORMER WITH TOWER
ELN 300141

MASTER INSTRUCTOR REFORMER WITH TOWER

The Elina Pilates Master Instructor is a state-of-the-art professional reformer that features a careful design with contemporary lines and high-quality finishes that make it a very attractive machine.

It includes everything necessary for a complete workout, also adding new additional features to those of a traditional reformer. The versatility of this reformer allows performing hundreds of exercises adapted to all levels, from beginner to advanced.

MASTER INSTRUCTOR PHYSIO REFORMER WITH TOWER ELN 300170

FEATURES

Same features as the Reformer Master Instructor, adding the tower components:

Aluminum tower with numbered hexagonal profiles on both sides, with a quick system for changing the position of all its components.

A non-slip push bar.

Maple wood roll-down bar.

Set of 8 tower springs.

1 set of simple foot grips.

Mat to cover the surface of the reformer.

Height of Master Instructor Tower: 203 cm.

Height of Master Instructor Physio Tower: 223 cm.

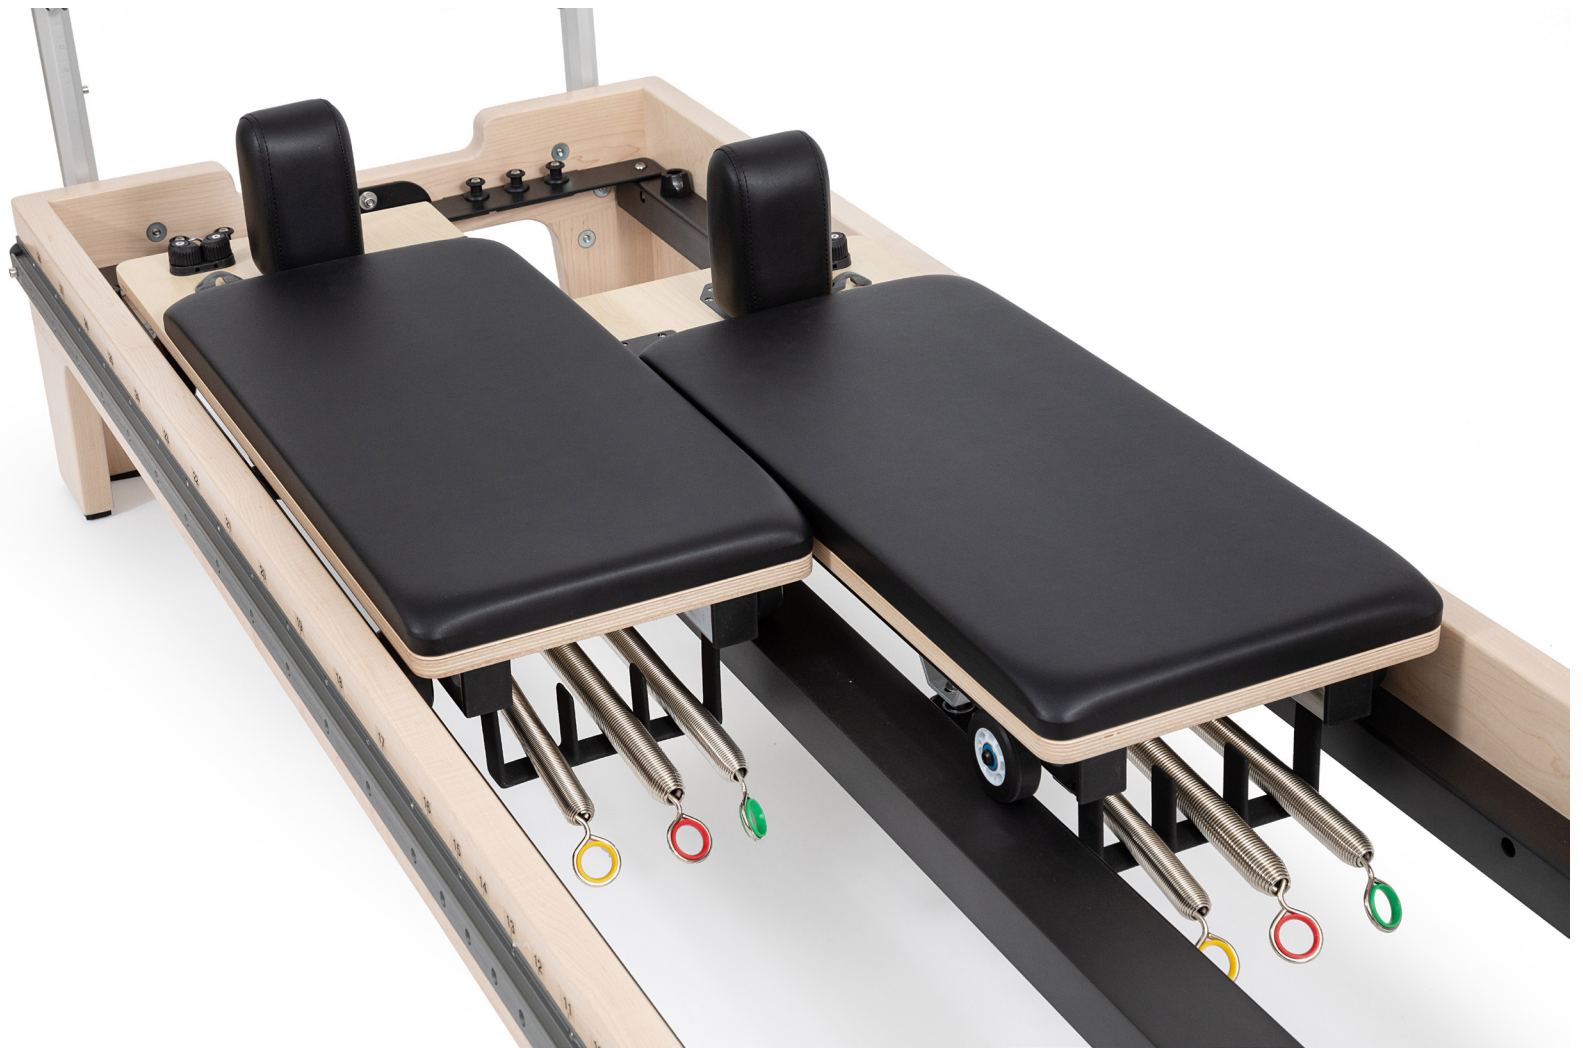

02

TWIN REFORMER

ELN 300610

The Elina Pilates Twin Reformer is a professional reformer of last generation, the most innovative option on the market that has a careful design and high quality finishes.

It includes all the essentials for a complete Pilates workout, adding the functionalities of its double carriage. The double trolley allows you to do hundreds of exercises and improve balance, strength and flexibility, all in a fluid and controlled way. The versatility of this reformer allows it to adapt to all levels, both for studies and rehabilitation.

CARACTERÍSTICAS

Made of light-colored American maple wood.

Waterproof varnish that protects the wood from wear and tear.

Tower with adjustable pulleys in height and width. Numbered on both sides.

Ultra-quiet double carriage.

Padded foot bar, with seven-position "Quick-release" quick-change system, with horizontal displacement of up to 28 different positions.

Complete set of six springs both at the headrest and at the feet of the

reformer. This allows exercises to be performed on both sides.

Padded shoulder pads that are easy to put on and take off.
Removable headrest.

Dimensions: 245 x 90 x 40 cm.

Tower Dimensions: 74 x 196 cm.

INCLUDES

Complete set of twelve springs:
Four yellow low resistance springs.
Four green springs of medium resistance.
Four red springs of high resistance.

Extra wide padded box. Can be placed either parallel or perpendicular to the reformer.

Jumping board.

Padded foot platform.

One set of ropes.

One set of padded hand grips, one set of double hand and foot loop

handles and one set of single handles.

Adjustable front foot strap: foot support strap at the front of the reformer.

Aluminum tower with hexagonal profiles.

Non-slip push bar.

Maple wood roll-down bar.

Set of 8 tower springs.

Mats to cover the surface of the reformer.

The Twin Reformer offers a multitude of benefits, highlighting its exceptional versatility that makes it the perfect choice to stimulate your creativity and keep your Pilates workout fresh.

With its dual carriage design and resistance on both sides, this equipment allows you to focus on aligning your body, correcting harmful postural habits and preventing injuries. In addition, it significantly contributes to the development of flexibility and strength throughout the body, while improving balance and stability, crucial aspects that positively impact your daily life.

In short, the Twin Reformer is not only ideal for injury rehabilitation and recovery, but also for anyone who wants to improve their flexibility, strength and balance. Its versatility and adjustment capabilities make it an essential tool for achieving your health and wellness goals.

03

WALL BOARD ONNE

It is a unique machine that is characterized by its versatility, and is also an excellent option for those who need to take advantage of space.

5 MACHINES IN ONE:

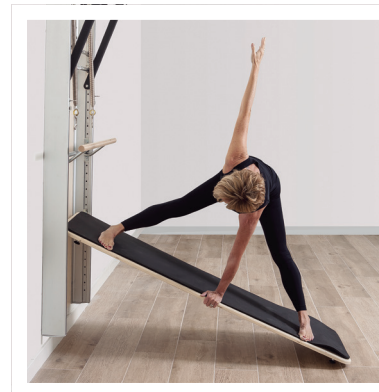

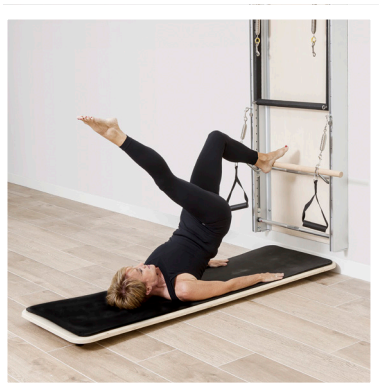

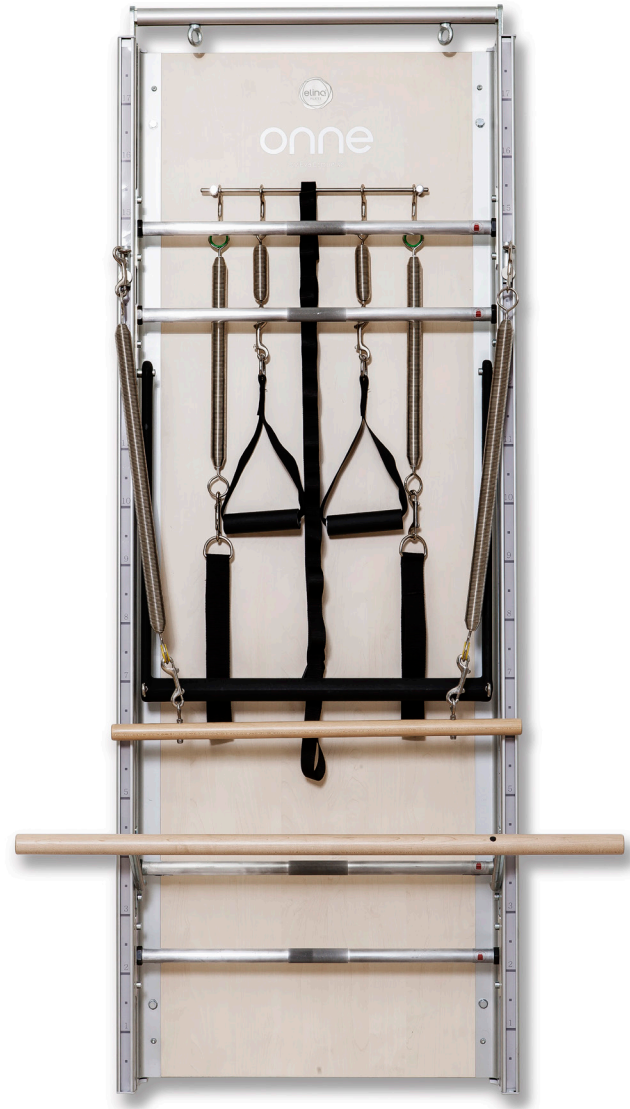

Cadillac + Ped-Pull + Inclined Platform + Ballet Bar + Suspension Training.

ONNE

Experience has always been a determining factor in creating innovative Pilates machines and, in the development of the Wall Board ONNE, it has been more important than ever. The combination of the experience of the renowned Pilates trainer Eva Espuelas and the manufacturing know-how of Elina Pilates have resulted in a new machine capable of satisfying the needs of the most demanding.

Versatility, elegant design, dimensions, adaptability and ease of use are just some of the characteristics that can define this unique 100% Spanish-made product. Revolutionizing the concept of the traditional Wall Board, the use of space offered by ONNE allows the work of Pilates Machines to be carried out by larger groups, as well as incorporating new elements that multiply the functionalities of its use, offering the user the possibility of enjoying 5 machines in one.

In addition to its careful aesthetics and adaptability systems to the specific measurements of each person and training, ONNE is a unique machine that incorporates features for the work of different machines such as the Cadillac, PED-PULL, inclined platform, ballet bar and training in suspension, achieving with all of them an exceptional performance, since all the components of the training are worked on.

INCLUDES

Among the innovative elements that it incorporates are:

INCLINED PLATFORM:

It maximizes results since it provides the performance of exercises on this plane, making them more complex depending on the degree of inclination that you want to exploit, achieving adaptations that cannot be developed on the ground. This platform is easy to store and clean and its non-slip mat can be easily removed and replaced.

BALLET BAR:

Cylindrical piece of wood that allows bodybuilding exercises and helps correct postural positioning.

BELT:

Element that can be used to carry out suspended work.

The ONNE Wall Board, made with the best materials and the characteristic quality of Elina Pilates products, is a solution that saves space, providing the user with the possibility of performing countless exercises on a single machine.

Made of wood and aluminum, ONNE is fully adjustable and ready to be anchored to the wall.

FEATURES

Wall Board.

Wooden mat table with non-slip mat and regulable base.

Ballet bar. Regulable height.

Roll-down bar.

Regulable push-bar.

Regulable Ped-Pull.

Hanger for springs and accesories.

Spring handle. Regulable height.

Springs: 2 long light (yellow), 2 short medium (green) y 2 short.

Handle complete set (foot handle and padded handle).

Adjustable fastening strap.

ELN 300021

BASIC

Without ballet bar and without mat table.

ELN 300022

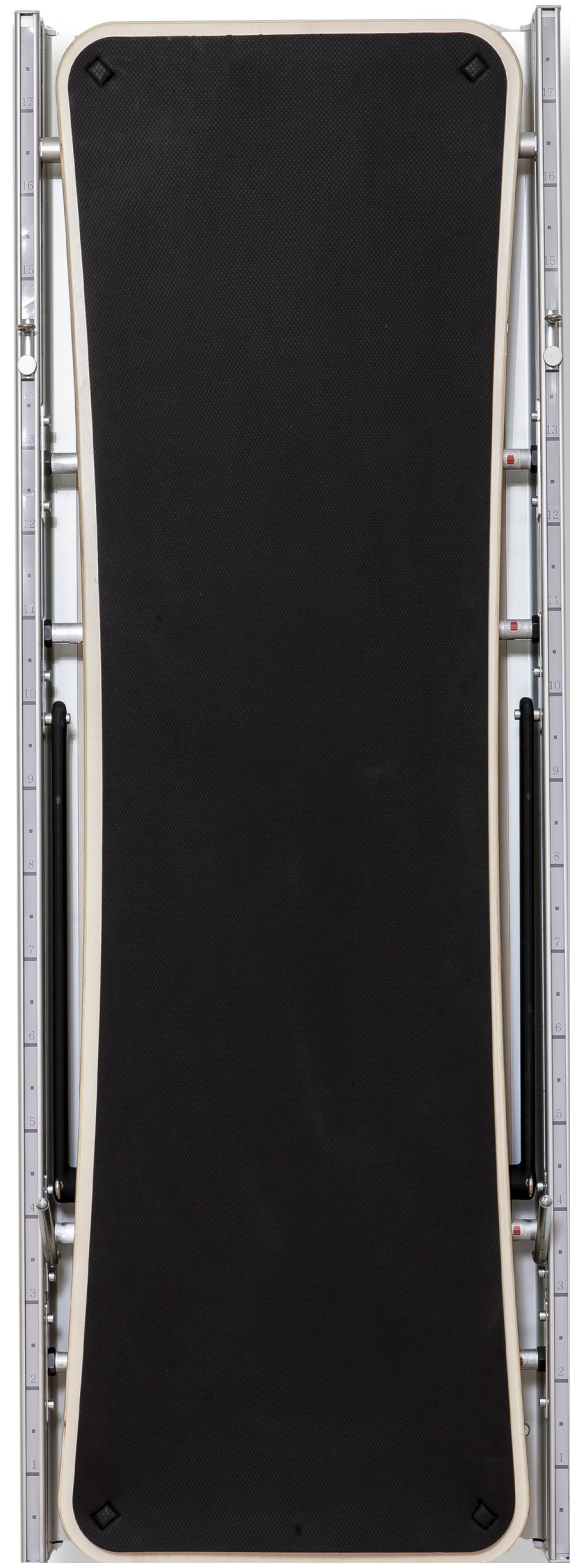

FULL EQUIP

With ballet bar and without mat table.

Machine width: 68,5 cm.

Width with ballet bar: 100 cm.

Height: 209 cm.

WALL UNITS

ELN 300010

Elina Pilates' Wall Units are one of the most requested products by the classic Pilates studios. Manufactured with high quality and durability materials. Covered with special leather for Pilates. Structure of reinforced wood, very resistant. Anti-slip, ecofriendly materials.

High density EVA filling. Very comfortable. Wall Unit Pilates is the ideal machine for the practice of Pilates in places where we have little space.

COMBO CHAIR STEEL BASE

ELN 400010

Light and resistant chair.

Black steel base.

Weight: 36 kg.

COMBINATION WUNDA / ELECTRIC CHAIR

ELN 400201

The Combination Wunda/Electric Chair is designed to offer the most complete Pilates training possible. The base is made of maple wood that provides great stability to any user. The resistance of the pedal is regulated by two springs that generate a tension adapted to the preferences of each user.

FEATURES

The central structure incorporates two steel bars with comfortable grips on the sides to help the user maintain balance and perform the exercises with the utmost precision without straining the joints.

The seat is upholstered in durable leather and padded with high density EVA foam.

The Classic Combo Chair with backrest includes:

Maple wood frame.

2 springs.

3 hook positions per spring.

Galvanized steel tubing with aluminum handles.

Length: 74 cm

Width: 63 cm

BABY CHAIR

ELN 400301

With the Pilates Baby Chair you can strengthen your back and accelerate the recovery process of injuries through more than 60 types of exercises. Can be performed similar exercises to those we do on other Pilates equipment, making it ideal for learning processes. An ideal tool for Pilates teachers.

INCLUDES

It accelerates the process of recovery from injuries and rehabilitation of adults and weak people. It also strengthens the back.

You can do exercises very similar to those you would do on a Pilates Reformer, a much larger machine. Therefore, it is perfect for learning the movements comfortably and safely.

Its smaller size makes it easier for the teacher to access the student and enhances the learning and teaching process.

Thanks to the structure of the Baby Chair you can perform more than 60 different Pilates exercises.

The Baby Chair consists of a base on which you can sit or kneel and two springs to place the arms connected to a movable backrest.

CLASSIC WUNDA CHAIR

ELN 400100

Classic Wunda Chair designed in solid maple wood of high quality and resistance. The resistance of the pedal is regulated by two springs that generate a tension adapted to the preferences of each user. Maximum comfort oriented to generate the least possible muscle tension.

INCLUDES

Maple wood frame.

2 springs.

3 spring hook positions.

Different upholstery colors available.

Length: 78,74 cm.

Width: 53,34 cm.

Height: 58,42 cm.

22

FOLDING MAT WITH HANDLES

ELN 3000501

Folding Classic Mat with handles with very comfortable and pleasant to the touch padding of great durability. It adapts to the structure of your body both in static and in movement. Allows muscle toning, increase flexibility and rehabilitation of injuries through specific exercises aimed at continuous evolution.

FEATURES

The two wooden bars of pleasant touch and great resistance allow exercises that relieve joint tension in the shoulders providing the necessary stability to perform the exercises.

It is very light and, thanks to its two wooden bars, it is very easy to move wherever you need it.

And because it is foldable, you can store it in the space you have at home or in your studio.

Perfect for both beginners and advanced users.

23

INCLUDES

Two detachable wooden handles.

Two moon boxes of the same thickness to complete its function.

It has two handles on the sides to transport it comfortably once folded and reduced in size.

Different upholstery colors available.

Length: 233,68 cm.

Width: 60,96 cm.

Height: 11,43 cm.

MTD Comprehensive Re-training System

MTD 000001

Immerse yourself in innovation with the revolutionary MTD Rotating Disc System, the result of years of meticulous research and testing. Conceived as a versatile and effective device, the MTD features a triangular arrangement of rotating discs that opens the door to a wide range of exercises for fitness professionals and home Pilates enthusiasts alike.

MTD

With the MTD, mobility, stability and coordination reach new levels of excellence. This equipment offers a unique platform to strengthen and mobilize the shoulder girdle, focusing on the integration of movements to optimize muscle coordination.

Safety and spine care are key priorities in the design of the MTD. It allows for expansive arcs of motion without compromising stability, providing safe relief for the spine. Rotation, flexion, extension and lateral bending exercises can be performed with precision, allowing isolation of specific levels of the spine to address individual restrictions.

When it comes to core strengthening, the MTD offers complete control over exercise intensity in a variety of positions. From four-stand work to lateral, prone and upright positions, each session is tailored to your specific needs, adjusting range of motion and load for a customized and effective workout.

The MTD becomes the perfect ally for athletes and sportsmen who require a specific focus on the shoulder girdle and rotational movements. Not only in the field of Yoga or Pilates, but beneficial in any sport that demands rotational movements, the MTD offers a unique platform for muscle development and improved athletic performance.

CLASSIC ACCESORIES

AIRPLANE BOARD

ELN 500105

Perform the Airplane Pilates exercise comfortably, safely and in a controlled manner on your Cadillac thanks to the Airplane Board. Its solid wood base provides the support and confidence you need to perform the most difficult Pilates exercises. Suitable for all types of users.

By attaching the Airplane Board to your Cadillac, you will be able to perform the Pilates Airplane exercise in a more comfortable, controlled and safe way. You'll literally be standing up in the air.

The solid wood base provides support and confidence during your Pilates workout, even the most difficult exercises.

BEAN BAG ROLL-UP DEVICE

ELN 500106

Strengthen the mobility of your arms, wrists and forearms by exercising with the Bean Bag. Place the bar at shoulder height and unroll and roll up the rope. Ideal for tennis elbow healing therapies.

The Bean Bag exercise consists of placing the wooden bar at shoulder height and rolling and unrolling up the rope around the bar. You must maintain a very specific position so that the fingers, hands, wrists and forearms are strengthened during the exercise.

26

BREATH A CIZER

ELN 500104

The Pilates breathing exerciser is a device with a windmill-type wheel. Blowing through the straw moves the wheel and improves diaphragmatic breathing.

CLASSIC ACCESORIES

FOOT CORRECTOR

ELN 500100

Correct and strengthen your feet, improve your balance and helps you to walk better with the Foot Corrector. It adapts to all types of feet and its material is soft and resistant, avoiding pinching or damage.

NECK STRETCHER

ELN 500101

With the Neck Stretcher you can strengthen your neck muscles, facial muscles and reinforce the stability of your spine. Regular use can lengthen the neck joint. To use it, you need a Pilates Cadillac, a Wall Unit or a Guillotine Tower for Pilates.

The Neck Stretcher has a strap that is tied around the forehead and back of the neck, a ring that attaches it to a machine that exerts resistance and two rubber straps that attach to a Cadillac, Wall Unit or Guillotine Tower. Once attached to your forehead, you must pull with your neck so that the machinery exerts resistance and you can exercise your neck muscles.

Of course, the correct use of the Neck Stretcher will not cause you any harm, but quite the opposite: it will strengthen your neck muscles, your facial muscles and reinforce the stability of your spine. Of course, you must do the exercises with care.

CLASSIC ACCESORIES

PUSH UP DEVICE

ELN 500103

Push-up device or structure to do push-ups for Pilates in a stable and safe way. Develops the nervous system through a wide range of movements.

It prioritizes the development and care of the nervous system and exercises the muscle groups in a uniform and balanced way. You can perform a wide range of motion in your push-up workouts, combining them and extending your sessions. Its main exercises define the body, they do not generate hypertrophy.

The push-up machine is very stable and safe, allowing all types of Pilates movements without interference. The very structure makes it easy to transport, as it has comfortable grips of great resistance and does not weigh excessively.

TOE EXERCISER

ELN 500102

Toe Exerciser or Pilates Toe Exerciser reinforces, corrects, strengthens and aligns the toes. It strengthens and flexes the musculature and increases the ability to do Pilates workouts correctly, since the exercises are always without shoes.

In most of the current Pilates machines, such as the Reformer, the feet assume a fundamental role in the correct execution of the exercises, since most of them are performed without shoes. It is therefore important to strengthen the toes with the Toe Exerciser.

The Toe Exerciser is very comfortable to use. Two soft straps are placed on the big toes of both feet, leaving the device between them. Once in this position, the feet are moved to the opposite sides, generating resistance in the straps and exercising the toes.

ACCESORIES

ARKUS PILATES

ELN 500006

Achieves greater freedom of movements adapting to the body contour. More versatile than the traditional straight bar. You can connect it to all kind of reformers. Made of laminated wood in different shades. 4 hooks for springs.

Size: 102 x 24,5 cm

Diameter: 3 cm

DISCOS DE ROTACIÓN

ELN 500002
