FITNESS ACCESSORIES

Gipara Fitness is the highest quality brand of professional fitness accessories owned by IMG S.A – a leading supplier of equipment and accessories for sport clubs.

ACCESSORIES WITH A CHARACTER

ABOUT US

Our mission is to support the clients of fitness clubs and individual users in reaching out for their sport goals. We wish to accompany them, assist them in breaking their own limitations and weaknesses, facilitating their better achievement of results and enhancing the comfort of their daily exercises. Thus, since the start of our business activity in 2015 we have been focusing on improving our offer of professional accessories for fitness networks and individual users. Using the experiences from cooperation with clubs and due to access to modern technologies and innovative solutions we provide products with modern design, high quality and functionality that guarantee safety and comfort of use.

54

STORAGE

SYSTEM

Unified storage system for all training accessories.

58

NEOS

Specialist scented disinfection liquid for accessories and training equipment.

62

APPLICATION

Training application for house and club.

66

G-WALL

G-wall is everything you will need for a personal training studio or a therapeutic workroom. The multitude of equipment versions of G wall enables various applications. You will be able to organize a functional training for all body parts and for each group of muscles separately on a very small area. At the same time you will have all necessary accessories and equipment at your disposal to do that.

MADE IN POLAND

Download on the
 App Store

GET IT ON
 Google Play

G-WALL

These days in order to carry out a full-scale training we no longer require 30 strength devices and a set of cardio equipment. All that can be done on just a few sqm in the comfort of our own room. The G-wall training frame ensures a full functional training for all body parts, providing safety, comfort of exercises and quietness of our own room.

G-Wall XL

COMFORT OF OUR OWN HOUSE

Unique design of the frame for G-wall exercises enables a full and comfortable whole body training on just 1 sqm. The correct course of training is guarded by a G-wall application which is a component of the frame along with the history of trainings and a division into all body parts. You don't have to move or fold anything at all. The G-wall frame is also a unique storage system. There's really nothing here that could break down.

HOTEL AND GUESTHOUSE

Several dozen years ago there were no bathrooms or TV sets in hotel rooms. Coffee machines and fridges appeared only recently. The same is already happening with IN-ROOM FITNESS types of solutions. Each hotel guest who trains and there are as many of them in Poland as 3 million, will be likely to choose a hotel room equipped in a gym rather than one without it.

On the other hand, if a room or an apartment with fitness equipment will cost on average by 20 EUR more, the investment in fitness equipment will pay off already after one year.

POWER POST

Power Post is a studio that may be entirely unmanned. Each studio includes, apart from the set of accessories and devices, two training applications that ensure safe and independent training and a possibility to generate reports to sum up the exercises.

UNIQUENESS AND SPECIFICATION

PERSONALIZATION OF THE DESIGN

G wall may be adjusted to one's own requirements not only by means of colours but, above all, by selecting proper accessories and their weights.

KEY TO EXERCISES

Each user will find suitable exercises - beginner, intermediate and even advanced users.

MODERN DESIGN

Ultra-modern and minimalistic design allows to adjust the G wall to each room. It will not decrease our mood even when placed in a bedroom.

HISTORY OF TRAININGS

G-wall application ensures constant access to the history of trainings, use of calories and time spent exercising.

SMALL AREA

G-wall requires only 0.5 sqm for the installation and approx. 3 sqm for a comprehensive

COMPREHENSIVENESS

Thanks to its structure G-wall enables training for all muscle groups and all body parts

G-WALL YOUR HOME GYM

01. G-Wall SH NR: GSH

The basic version of the frame takes a minimum space but provides full body training. It is perfect for installation at home or in a hotel room.

02. G-Wall MH NR: GMH

The basic frame version expanded by the possibility of additional calisthenic training. Similar to the SH version it will be a great fit in an apartment or a larger hotel room.

03. G-Wall LH NR: GLH

LH is a higher hotel-home version enhanced by a climbing ladder.

Due to its height it requires installation in rooms with height of at least 2.8 meter.

04. G-Wall PLUS NR: GPLUS

PLUS is a basic version of the functional frame with an additional gym ladder which additionally increases training and rehabilitation opportunities. It is made from the best quality of steel thanks to which its durability is similar to the professional frames in fitness clubs.

05. G-Wall XL NR: GXL

The XL version was enriched with a rotator and long and short hangers for the barbell. It enables conducting trainings with barbells, however, requiring larger rooms. It will best suit larger flats, houses or hotel training rooms.

06. Create your own G-Wall

Create your own G-Wall. Select the number of profiles, the colour and choose additions as well as accessories the way you like them to be.

Each exercise frame is created in a set with professional accessories.

Available colors:

-  Concrete-Black
-  Space-Black
-  Rose-Black
-  Naked

*possibility of choosing your own color

Create your own G-wall version in four steps.

Select the number of profiles

There may be two or more of them. Everything depends on the size of the area you have at your disposal or the G-wall which you need.

Select the colour

G-wall occurs in three basic colours but we may also paint it in any colour from the RAL palette that you choose.

Select elements

G-wall functionality depends to a large extent on equipment elements. Although even the most basic model will ensure over 39 types of exercises, once you properly select additional equipment elements, you will be able to multiply its training possibilities.

Selects accessories

The accessories are for G-wall what applications are for a smartphone. They further enhance the whole platform, allowing to choose proper exercises for several G-wall users.

ADAPTIVA

Exercise cage Adaptiva enables a safe and fully functional training of the whole body both for amateurs and professional users. The design of the cage ensures comfortable accessibility and usefulness of training accessories to go with it. While practicing you no longer need to run around the whole club in order to find the necessary accessories as you have everything within your grip.

MADE IN POLAND

01. VERSION 1-0

The basic Adampativa consists of the main construction element to which one may add additional accessories in the form of poles, ladders, targets and various types of anchors and crampons.

02. VERSION 1 - 1

The basic frame with one additional pole that we can add at any angle and from either side of the frame.

03. VERSION 1 - 2

The basic frame with two additional poles that we can add at any angle and from either side of the frame.

04. VERSION 1 - 3

The basic frame with three additional poles that we can add at any angle and from either side of the frame.

05. VERSION 2 - 4 Spread

The structure of ADAPTIVA system enables multiple expansions of training possibilities for the frame, considering the available club area. Adaptiva 2-4 in SPREAD version is just a sample frame expansion by width.

06. VERSION 2 - 4 Long

The structure of ADAPTIVA system enables multiple expansions of training possibilities for the frame, considering the available club area. Adaptiva 2-4 in LONG version is just a sample frame expansion by length. It is particularly useful for narrow and, at the same time, long rooms.

Each exercise frame is created in a set with professional accessories.

Available colors:

-  Concrete-Black
-  Space-Black
-  Rose-Black
-  Naked

*possibility of choosing your own colour

EXTERA

Unique design of the frame for Extera training will make each interior glow. The Adaptiva Extera training frame will not take a lot of space and, at the same time, it will turn a housing estate, a part or an exclusive hotel into one's favourite place of rest.

MADE IN POLAND

ADJUSTMENT TO NATURE

Unique design of the frame for Extera training will make each interior glow. The Adaptilva Extera training frame will not take a lot of space and, at the same time, it will turn a housing estate, a part or an exclusive hotel into one's favourite place of rest.

IT LOOKS AND WORKS WELL

The Extera training frame was made of the highest quality materials that enable the use of its benefits in the rain, in the cold and under the desert sun. Stainless steel (INOX) and polyurethane (CPU), apart from resistance to weather conditions, ensure long durability and unique resistance to wear and tear.

SAFE AND SUFFICIENT

The ergonomic structure of the training frame Extera guarantees safe training for the whole body both to younger users and seniors. Whether you are an amateur or a professional. Already in its basic version it facilitates conduct of 18 exercises for 6 muscle groups. Moreover, it will find its use in case of stretching exercises.

EVERY AREA AND DIMENSION

Nowadays, in order to carry out a full-scale training we need about 30 gym devices and a set of cardio devices. Each muscle group may be trained in fresh air, using the unique possibilities provided by the Extera training frame. This type of training is for free and the G-wall application guards its safe and valuable course.

STRENGTH

In this category we focus, above all, on what will help us choose a greater strength, muscle weight and endurance. Proper training equipment, based on mass of a given object, have always been there. We however reinvented them. We perfected their functionality, increased their ergonomics or improved the comfort and safety of training. See it for yourself that strength training may be effective but also comfortable and aesthetic at once.

HYBRID DUMBELLS

We can exercise on any muscle group using dumbbells. Regardless of whether you wish to increase your strength, body mass or simply improve your muscle tonus and get rid of some fat tissue. Dumbbells are the foundation of any strength training. It is also the foundation of our offer; thus they may be found in as many as four categories in our offer. Each of these categories has a slightly different designation, but all of them have been made out of the highest class materials and are distinguished by unique endurance. Each dumbbell was designed so as to ensure the highest possible safety to the user and to all precious objects surrounding him. Therefore our dumbbells do not have any sharp edges and are made of springy materials.

OBSIDIAN DUMBBELLS

Homogenous and high-quality made of polyurethane TPU and stainless steel. Their monolithic design ensure the highest resilience on the market, allowing to apply training tools in the most hardcore gym studios. Their shape prevents uncontrolled displacement of the dumbbell after putting it down. Large and transparent marking of the weight and black colour facilitate long-term use without loss of attractiveness.

HYBRID BARBELLS

Similar to hybrid dumbbells, also hybrid barbells combine the ratio of value to price of rubber barbells with a quality and durability of polyurethane barbells. We have designed them in such a way, so that the elements of barbells that are the most exposed to damages are made of polyurethane. The remaining part of the barbell (apart from griffin made of stainless steel) is made of highly springy rubber. The barbell construction also allows for the selection of any colour of the barbell for a periodical replacement of polyurethane elements, also during application. Thanks to this we prolong the product life while also enhancing its visual attractiveness for potential users.

02

FUNCTIONAL

Multi-layer functional training strengthens and facilitates our holistic body. Feet, knees, arms, shoulders and all deep muscles responsible for the correct arrangement of the body not only gain the strength but also achieve fastness of reaction which leads to comfortable use of equipment.

SPACE STRETCH MAX

Rubber for exercises has been designed as a training tool for astronauts remaining in the state of zero gravity. It works best both during personal training and a group session. It is perfect for strengthening and increasing muscle flexibility. Perfect for training with low intensity as well as an element of interval metabolic training which allows to increase the metabolism and speed up fat burning. It is an original product, designed by Gipara Fitness team. Guaranteed durability of bridge construction and comfortable grips that do not cut into hands, allowing for a comfortable training with individual selection of loads. Thanks to the application of a grip on the additional griffin, the device is more attractive and diverse. Space Stretch® Max is a resistance band that may easily replace other bands such as power band, mini band, tubing or latex band.

COLOR **NR: 6471**

SPACE SET

Space Set is the smallest of all gyms that may be kept in a drawer. It contains Space Stretch Max, which is a silicone expander launched for training in space and Space Bar - dedicated to form part of the set and increasing the range of exercises, aluminium, regulated griffin. Depending on the choice of version we may get an assembled griffin with total length of 108 cm or in a compact dimension of 58 cm.

COLOR Space Set 58 cm Space Set Plus 108 cm

● **NR: 7918** **NR: 7919**

BALANS BAG

Balans Bag is a multi-task training tool that facilitates whole body training in two modes. The Balance-sensory mode uses instability of the liquid inside the BB tool and thanks to this, ensure intense training of deep muscle fibres, impacting movement coordination and feeling of balance. The mode of load bag simulates exercising with a standard load bag. However, due to the additional strengthened BB layer the load may be gradually increased from 1 to 19 kg.

COLOR **NR: 4992**

1. Balans Bag™ after disassembling and pouring out water takes almost no space. That is why it is a perfect training tool to take with you when travelling or for your home training.

2. Due to the possibility of personalizing the markings As well as the inside scale that facilitates the choice of proper weight, BB™ may be used during group classes. For this purpose we have construed a dedicated storage system for it.

IRON SET

Iron Pump Set is a classic set of exercises in a modern version. It contains a set of urethane or rubber discs, any griffin with clamps and comfortable, stable rack where you can effortlessly store the whole set of loads along with the griffin. Modern design of the rack fits perfectly into modern house interiors. It takes little space thanks to which the space on which it remains is tidy and clean.

HIGH BAG

The ergonomics of exercises with High bag is second to none. High bag is equipped in special soft and comfortable grips for all sorts of moves. Lifting, pushing, pressing and throws and swings have never been so perfectly precise. Endurance, soft foam cladding and weight progression make High bag a safe and irreplaceable training tool in any gym.

Weights range: 5-25 kg

COLOR 5 kg
 ● ● ● ● ● NR: 3205

G SAC

The G-sac bag is a training tool for dynamic but safe functional training. G-sac is probably the most enduring training accessory from the entire Gipara collection. It will survive throws, squeezes and even jumps made on it and it will remain intact. Round, neoprene planking is characterized by unique softness and comfort of grip, even in case of significant G-sac loads.

Weights range: 2-8 kg

COLOR 5 kg
 ● NR: 3205

MEDICINE BALL

Medicine balls have been used as ideal training accessories since the 30's of XX century. They have obviously been evolving during that time. They are made from modern materials but they still constitute a fantastic component

In each type of functional training. Medicine balls by Gipara occur in two versions that differ in diameter size and contain full progression of loads from 1 to 10 kg.

Weights range: 1-10 kg

COLOR 1 kg

● **NR: 3331**

SLAM BALL

The latest slam ball by Gipara are characterized by unique endurance. They were designed with emphasis on maximum suppression of hits and surety of grips. Broad load scope ensures accessibility for each user regardless of advancement level.

Weights range: 4-20 kg

COLOR 4 kg

● **NR: 4901**

WALL BALL

Wall ball is a training ball in an oversize format. The degree of Wall Ball bounce was adjusted to facilitate functional training for users with the use of throws against the wall. Comfortable, soft and safe Wall Ball is a perfect tool to start your training adventure with functional exercises. Gipara Wall Ball is known for its wide colour range and very transparent markings of loads which make the choice of proper ball easier for the users.

Weights range: 1-15 kg

COLOR

2 kg

NR: 3090

SOFT BOX

Consisting of 4 independent parts, soft pylometric SoftBox platform is distinguished by its large stability. High weight of individual system elements along with low location of the centre of gravity of each of them ensure significant safety for the user. Safety level is additionally increased by the applied anti-slip layer on top of each element of the soft box. On the other hand, comfort of use of the platform is enhanced by lifting and moving the soft box.

COLOR

NR: 4899

SLEDS

Simple but strongly physical tool for building leg muscles and skeletal muscles. Our sleds have hooks designated for a hauling rope and adjustable newel posts enabling pushing of sleds from either side. The composition of skids in sleds with sliding material of a dedicated rug constitutes the most crucial element which determines the comfort of exercising and the lifespan of the rug. If too slippery, it will deprive the user of the grip and if the rug reaches too high levels of friction, it will wear out or even melt faster under the impact of temperature produced while pushing the sleds.

COLOR 1 kg

● **NR: 4898**

LAWN

Our Gipara carpet floors ensure the most optimum friction coefficient while at the same time allowing for a long-term trouble-free application.

Available lengths: 7m i 12m.

STUDIO

Aerobic classes, so popular several dozen years ago, have been turning into multi-class rooms for group trainings. The universal nature of such rooms is also determined by their equipment. The more equipment they possess the more diverse group trainings can be achieved in them. Rooms for group classes are usually a part of large fitness clubs but we may come across universal rooms for group classes in smaller, boutique clubs more and more often these days. In this case they need to provide proper level of intense exercising not only in case of the most popular group classes but also during intense functional training

STEP

Gipara step is a universal training platform the possibilities of which exceed traditional training steps. It ensures practically unlimited possibilities of regulation of its height. It remains exceptionally stable and may even replace a plyometric platform in the club. It also facilitates training with a broad scope of angle settings of the working surface. Special construction and grips for carrying, placed in its centre of gravity ensure unique comfort and lightness during its handling or transport.

COLOR **NR: 3409**

RUBBER PUMP SET

Body pump set for strength trainings. Perfect when kicking off with the adventure of bodybuilding or for effective fitness exercises or CrossFit. Its strong side is the easiness of changing loads which are covered by a rubber mixture that protects against damages and Suppresses the noise while putting away. High quality material from which the barbell and plates make the power pump set look really aesthetic and prevent its fast wear out during use. Profiled and covered with a soft foam griffin ensures maximum stability and comfort of training.

COLOR **NR: 2506**

PUMP SET OBSIDIAN

Both versions of pump sets by Gipara, rubberised and polyurethane, were designed with the thought of commercial use. They are distinguished by greater endurance and safety of use. Their construction and used materials facilitate fast load exchange. The shape of plates enables their use as dumbbells and prevents self-acting rolling on the floor. Both material versions of pump sets have a rack that fits to the other Gipara products for 15 or 30 pieces of equipment.

COLOR **NR: 7029**
